

Project Portfolio Management

... for the Salesforce.com Platform

What does it do?

Sentient Project Portfolio Management allows you to seamlessly extend your Salesforce.com platform to manage all of your project delivery and related activities.

Sentient makes managing your business easy.

The huge breadth of functionality is designed to make it easy to gain control of your business. Take advantage of four key functional modules:

Project management – track milestones, risks and issues, status reporting, budget management

Project Portfolio management – portfolio status reporting, executive reporting, assessment and prioritization, pipeline management

Team and Resource management – Team scheduling, staff productivity tracking

Time and Budget management – integrated timesheeting, staff and team billing targets

How will it help my business?

Sentient will give you back the confidence that your business is running smoothly. With all of your project and team activities managed and visible through one central system, you can be sure that everything is on track. Rise above the daily grind and let your business run itself.

Your sales people and other key stakeholders get real-time unadulterated visibility of projects as they progress, so they can have full confidence when talking to customers.

Visually navigate your different project portfolios and keep an eye on important or at-risk projects. Everything is at your fingertips allowing you to truly manage by exception.

The comprehensive suite of Team management tools will help you to get the most out of your most precious resource, whether that be optimizing work schedules, benchmarking and tracking performance or simply assigning new items of work.

Implement company wide time-tracking with the highly intuitive, work schedule integrated timesheet tools. Track budgets in real time, monitor productivity and understand real profitability on your projects.

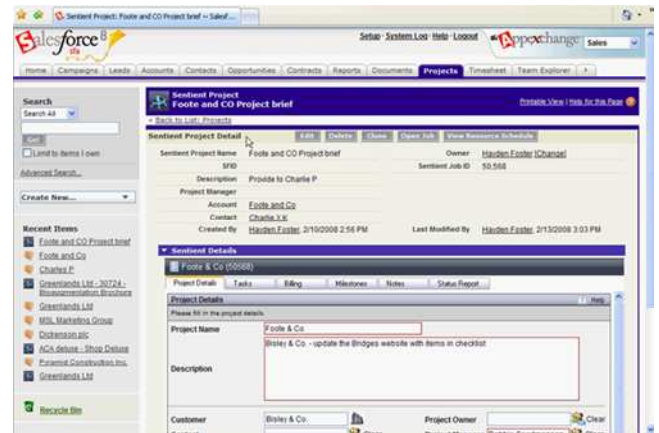

Why Sentient?

- Huge breadth of functionality
- Simple, intuitive user interface
- Flexible, configurable, modular
- Seamless extension of Salesforce.com
- Configured exclusively to fit your needs
- Step by step implementation programme

What does it look like?

Sentient is simply embedded into your existing Salesforce implementation. The intuitive interface seamlessly blends into the Salesforce features you are already familiar with.

The screen shots on the right hand side give you an indication of just how easy Sentient is to use.

What are some of the benefits?

Keep everyone aligned – everyone in your business has visibility of how projects are tracking and where they should be

Capture the right information – ensure that important information is captured when it needs to be

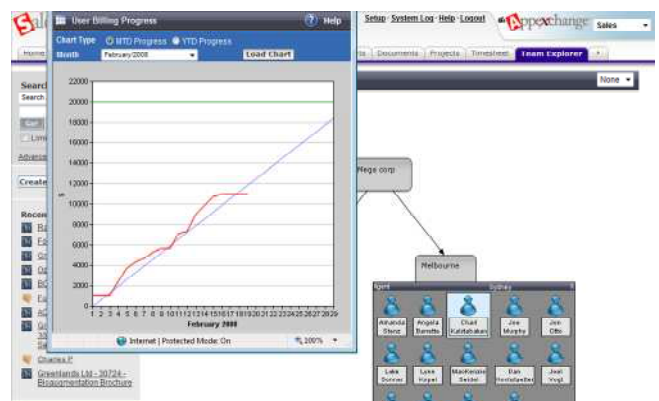

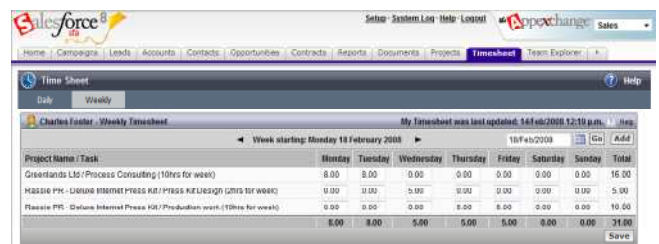

All information in one place – all project information and files are in one easy to access location

Work effectively – bring structure to your business; your staff interact through the tool, ensuring effective collaboration

Enforce best practice – have confidence projects are governed through the right steps – give your customers a consistent, high-quality experience

Identify problems early – monitor progress and act early on troubled projects

Full audit trail – access to full project history; learn from your successes and mistakes
